

Farmer's Experience

(Village: Madhi Ji Dhani, Tehsil: Chachro)

Farmers, primarily are dependent on livestock and rainfed agriculture for livelihood. They observed changes in rainfall patterns over the last 20 years (either too less or too much water), leading to crop damage. Post 2022 floods, selected NGOs introduced alternative livelihoods, such as saline fish farming by providing matching grant to develop a small cage and install a solar based small motor pump for Tilapia fish farming, resulting in good yields and sales. The setup is currently a demonstration point for farmers residing in the area with some adopting the livelihood option.

District **THARPARKAR**
Province Sindh
Population 1.778 Million
Climate..... Hot and Dry Desert Climate
Altitude 13 m above sea level
Average annual rainfall 271 mm
Temperature range..... 23^o C to 35^o C
